SYSTEM	Roof pre-wiring for solar panels and satellite TV / Rearview camera included as standard
PLUS	Anodized aluminum hinges and carbon fiber entry handle

Mobility +

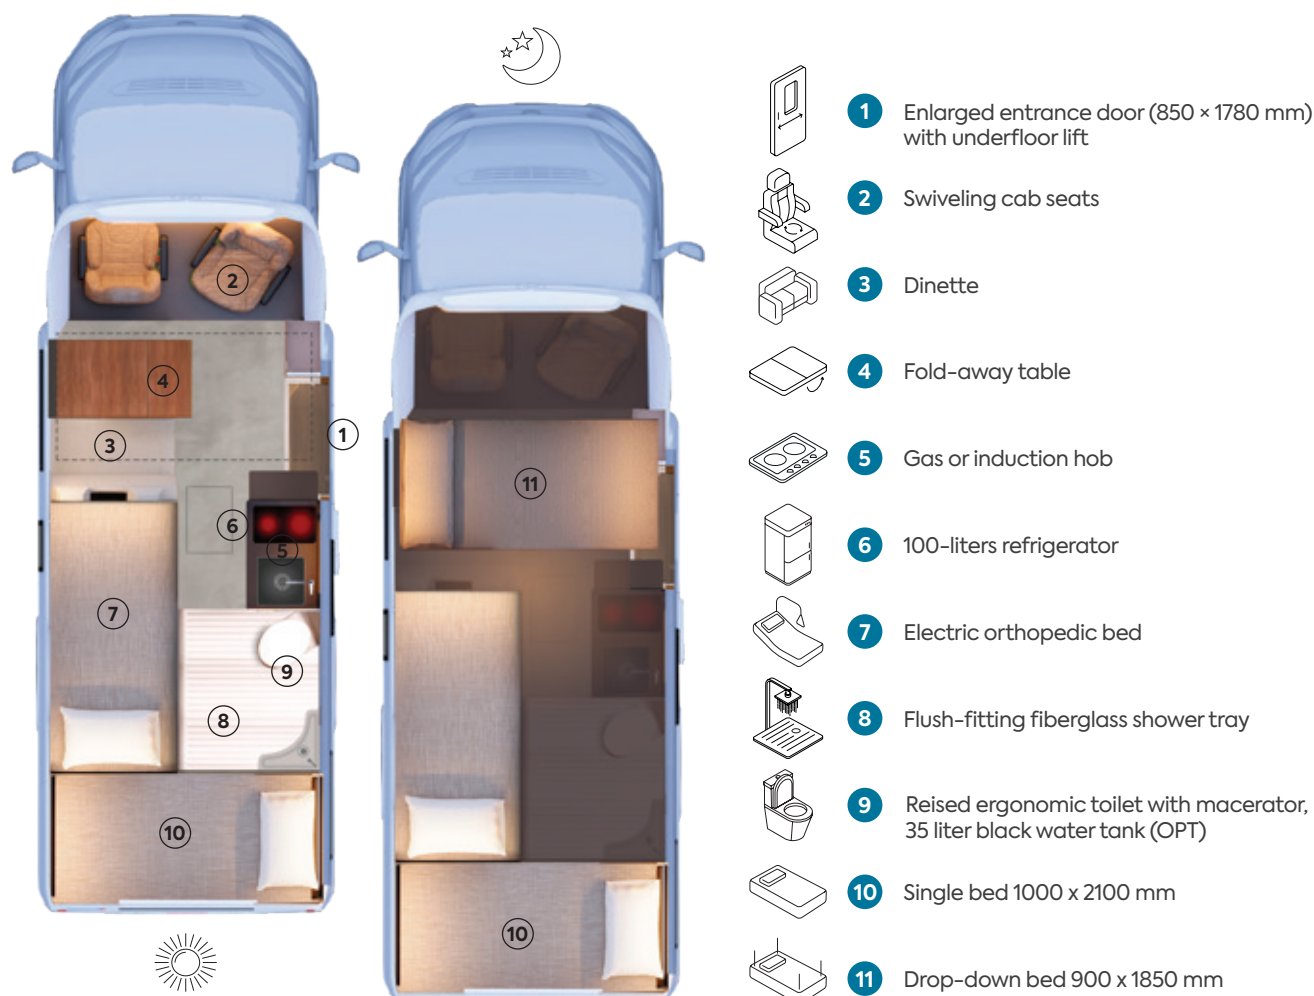

Optimized layout wheelchair-accessible, with automatic underfloor lift, enlarged entrance door, reinforced aluminum flooring, electric orthopedic bed, integrated driving controls, raised ergonomic fiberglass toilet.

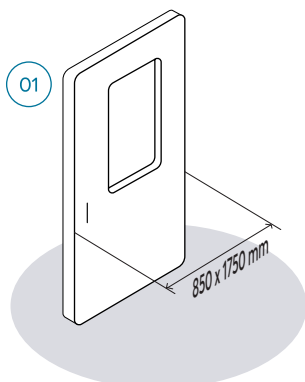

Deluxe 695 / Mobility +

In the **Deluxe 695 Mobility+**, the layout is **custom-designed for wheelchair accessibility**, with generous maneuvering space and fully accessible pathways. Each area is designed to allow independent use of all on-board services, including driving. From control panels to the steering wheel controls; from the living

area to the kitchen; from the bathroom to the sleeping area. Every space in this vehicle has been redesigned according to specific needs. A vehicle conceived and developed from the start to offer freedom of movement, living comfort, and independence, without compromising the quality, functionality, and style typical of Atlantis campers.

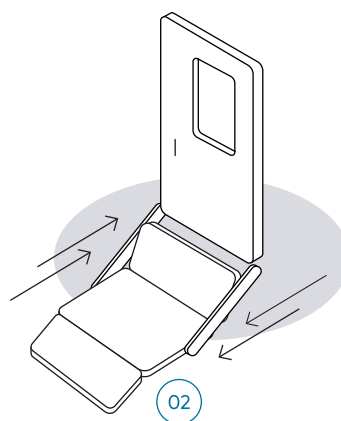

01. Accessible monocoque with enlarged door

The fiberglass monocoque has been adapted with an enlarged entrance door, providing an 85 cm wide opening to allow easy wheelchair access.

02. Underfloor lift Autolift

The vehicle is equipped with an electro-hydraulic underframe lift, operated via a wireless remote control, allowing independent boarding and alighting from the camper.

03. Reinforced aluminum floor

The floor is made with a reinforced honeycomb aluminum structure, designed to withstand heavy loads and ensure rigidity, safety, and long-lasting durability, even with a wheelchair.

04. Fiberglass bathroom

The bathroom is entirely made of fiberglass and custom-designed, including a raised ergonomic toilet, sink and floor. The spaces, surfaces, and components are engineered to ensure accessibility and hygiene, including a dedicated toilet with macerator and 35-liter wastewater tank.

05. Electric orthopedic bed

Electric orthopedic bed designed to ensure comfort, easy access, and personalized position adjustment.

06.

Integrated driving controls

The vehicle is equipped with integrated driving controls, allowing autonomous and safe management of the main systems while driving, according to the user's needs.

07.

Custom retractable dinette table

The dinette table is retractable, allowing the wheelchairs to move directly and independently and sit alongside the driver's seat. This solution ensures complete autonomy while maintaining the comfort of the living area.

08.

Accessible controls and central units

The system control units and onboard controls are positioned at an accessible height, enabling autonomous and intuitive management by a person with reduced mobility.

09.

Electric motorized awning

The vehicle features an electric motorized awning, operable in a simple and intuitive way. This solution allows effortless opening and closing, improving user comfort and independence.
